

In-Situ Flange Facing Capability

Flange Facing Capability

MOSS LIMITED has a full range of I.D. and O.D. mount Flange Facing machines for re machining of all types of Seal Faces such as Raised Face, RTJ and Hub type connections. Ranges from 2" I.D. to 177" (50mm to 4500mm)

These machines can achieve machine shop tolerances and produce surface finishes from 63 to 250 CLA, without fine polishing. Internal and External Flange Facing machines are versatile for use on non standard applications such as Internal Boring, Outside Diameter Turning and Producing Flat Finishes on non circular items.

These machines can also be used on Heavy Wall Pipe Work for Weld Preparation.

Machines can easily be mounted onto Tube Sheet Mounting Plates when re machining the joint face of heat exchangers.

Flange Facing machines are available in 2 drive options, Pneumatic and Hydraulic.
